WATERSTORY

THE STORY BEHIND CORNELIUS

25 YEARS OF EXPERIENCE

Since 1931, Cornelius has been pioneering innovative beverage dispensing equipment for major brand owners and retailers worldwide. As a world leader in the Beverage Dispense industry, we have gained recognition for our expertise in carbonation and refrigeration.

Our leading position is underpinned by engineering expertise, intricate market knowledge and our unique partnering approach which has driven targeted innovative solutions for the last 25 years with Water Dispensing technology.

PREMIUM WATER DISPENSERS

As a manufacturer of point of use water dispensers, our mission is to be the most admired and innovative global manufacturer of premium quality water dispense systems.

Our focus is to engineer premium point of use water dispensers only, designed for a ten years life-time, environmentally friendly which will bring satisfaction and comfort to the users through outstanding features and proven reliability.

FACTS ABOUT US

- Beverage dispense manufacturer since 1931
- Engineering expertise and intricate market knowledge
- N°1 German manufacturer of point of use water dispensers

Designed, developed
and made in Germany

UNIQUE MANUFACTURING PROCESS

Our Water Business is based in Germany with a dedicated team focused on excellence, innovation, quality and expertise. Our team's focus is on best production practices illustrated by our unique state-of-the-art 3-step manufacturing process integrating top standards of hygiene.

Indeed, Cornelius Germany is certified complying with DIN EN ISO 9001:2008 delivered by the renowned German organization TÜV.

OUR UNIQUENESS

R&D investments, quality focus to ensure performance and reliability, exceptional service and support; some of the reasons why Cornelius is the N°1 German manufacturer of point of use water dispensers.

That is where the Cornelius Water history comes from.

PEARLMAX 4S

PREMIUM WATER QUALITY THROUGH A PREMIUM WATER DISPENSER

PEARLMAX 4S

High Standards of safety and hygiene – great dispense and refrigeration capacity

The PearlMax 4S is a very powerful and stylish table top dispenser. Its high capacity for chilling and carbonation ensures you get perfect water every time.

The PearlMax 4S offers various premium functionalities: touch pad control panel, multilingual LCD display, free flow or portion control dispense, anti-leakages safety devices.

The PearlMax 4S has been engineered to deliver hygienic water thanks to its nano-coated, non touch dispensing nozzle and optional UV lamp.

The PearlMax 4S is also available as a floorstanding unit thanks to its optional base stand.

KEY FEATURES INCLUDE

- Premium functionalities: anti-leakages safety devices, premium hygiene standards
- Table top or floorstanding to suit any environment
- Choice of ambient, medium and full sparkling water

PEARLMINI

FILTERED WATER THROUGH A UNIQUE AND COMPACT DEVICE

PEARLMINI / DS

Perfect fit for small areas, innovative features

The PearlMini is a compact and elegant table top water dispenser offering various functionalities: electronic display available in various languages, free flow or portion control dispense.

Separate the individual components of the PearlMini to suit any installation types. The dispensing column stands on a stable surface, the cooling unit in the cabinet underneath: You have a unique space-saving water dispense solution.

The PearlMini DS is a PearlMini variation. It is a basic engineering, low-acquisition cost table top offering chilled and ambient still water only.

KEY FEATURES INCLUDE

- Premium functionalities: anti-leakages safety devices, premium hygiene standards
- Available in black or white, multiple customization options through specific colors and branding
- Choice of ambient, medium and full sparkling water

CR PRO

HIGH CAPACITY COUNTER TOP WATER DISPENSER

CRPRO ELECTRIC

CRPRO MANUAL

CRPRO

Space saving powerful counter top for catering and HORECA sectors

The CRPro is a high performance counter top water dispenser, easy to operate thanks to its electric and manual taps, whose design is a perfect fit to any HORECA environment.

Thanks to its ice bank cooling refrigeration technology, rooted in the Cornelius leadership in the Beverage Dispense industry, the CRPro offers a dispense capacity of 120 liters per hour, with a refrigeration capacity of 40 liters*.

The CRPro allows professionals to offer their customer a perfectly chilled and carbonated filtered water even during the peak times without any downtimes.

It is also equipped with a built-in anti-leakage to offer comfort and safety.

*Amount of product continuously dispensed with a ΔT of 6 °C.

KEY FEATURES INCLUDE

- Space saving powerful counter top with ice bank technology
- Adjustable height of dispense nozzle
- Easy to install and service – integrated CO₂ regulator and water pressure regulator
- Choice of chilled, medium and full sparkling water

PEARLMAX UC

PREMIUM WATER QUALITY

PEARLMAX 4S UC

High performance from a cooler that can fit in any cupboard with premium water quality

The PearlMax 4S UC is a compact cooler which perfectly fits in any kitchen cupboards. Its capacity of chilling and carbonation ensures you get the perfect water any time required.

It is compatible to the PearlTower only to get a space-saving dispense solution while maintaining high performance level.

The PearlMax 4S UC features a control panel through the PearlTower which displays very useful information about filtration, maintenance requirements or CO₂ level.

It is also equipped with a built-in anti-leakage to offer comfort and safety.

KEY FEATURES INCLUDE

- High cooling performance with low energy consumption dry cooling system
- Compatible to the PearlTower
- Premium functionalities
- Choice of chilled, medium and full sparkling water

CR PRO UC

IDEAL FOR CATERING AND HORECA

CRPRO UC

Space saving powerful water cooler for catering and HORECA sectors

The CRPro UC is a high performance water cooler, easy to install and service thanks to its smart engineering, whose design is a perfect fit to any HORECA environment.

It is available as a mechanical or electrical version to support towers with electrical or manual taps and to get a space-saving dispense solution while maintaining high performance level.

Thanks to its ice bank cooling refrigeration technology, rooted in the Cornelius leadership in the Beverage Dispense industry, the CRPro UC offers a dispense capacity of 120 liters

per hour, with a refrigeration capacity of 40 liters*.

The CRPro UC allows professionals to offer their customer a perfectly chilled and carbonated filtered water even during the peak times without any downtimes.

It is also equipped with a built-in anti-leakage to offer comfort and safety.

*Amount of product continuously dispensed with a ΔT of 6 °C.

KEY FEATURES INCLUDE

- Space saving powerful water cooler with ice bank technology
- Easy to install and service – integrated CO₂ regulator and water pressure regulator
- Choice of chilled, medium and full sparkling water

CR COOLERS

CR50 AND CR70 COOLERS WITH HIGH PERFORMANCE

CR50 AQUA UC

CR70 AQUA UC

CR50 AND CR70

The reference range of water coolers for professional use

The CR cooler range, CR50 and the CR70, is a range of water coolers with very powerful dispense capacity.

Its proven performance, reliability and sustainability meet the needs of demanding professionals who want to be able to dispense chilled sparkling water whatever the circumstances and without downtimes.

The CR50 can absorb peak demands up to 163 liters*.

The CR70 cooler, which offers unique external visible LED's showing unit status (CO₂ level, pump) can absorb peak demands up to 291 liters*.

*using ice bank full capacity

KEY FEATURES INCLUDE

- Powerful water coolers with ice bank technology
- High demand applications with peak dispense situations
- Choice of chilled, ambient and full sparkling water

PEARLTOWER

PREMIUM DISPENSING TOWER

PEARLTOWER WHITE

PEARLTOWER BLACK

PEARLTOWER

Space saving water tower for catering, HORECA and residential sectors

The PearlTower offers various premium functionalities: touch pad control panel, multilingual LCD display, free flow or portion control dispense.

The PearlTower has been engineered to deliver hygienic water thanks to its nano-coated, non touch dispensing nozzle and optional UV lamp.

For the cooling technology we have dedicated range of water coolers available.

The PearlTower is compatible to the PearlMax 4S UC and the CRPro UC electronic.

KEY FEATURES INCLUDE

- Space saving water tower
- Hygienic design
- Available in black or white, multiple customization options through specific colors and branding
